French artists Mazzacio and Drowilal's new book *The Happiness Project* is a vibrant and witty journey through Silicon Valley. The duo merge elements of art history and digital culture in collage-like still lifes (or 'contemporary vanitas', as they describe them). Californian ideals of health, wellbeing and new ageism are intercut with images of everyday objects, technology ephemera and office desktops.

*The Happiness Project*, €30, published by [RVB Books](#)
